SET UP

Randomly determine a player to place her Wrestler in the center of the table, then the other player places her Wrestler in base contact with it. After both Wrestlers have been placed, each player secretly writes down a number between 0 and 4 (this is their Bet).

DEPLOYMENT

Randomly determine deployment.

SPECIAL

The two Wrestler models may not take Attack Actions against any other model except the opposing Wrestler. No other model may target an enemy Wrestler with an Attack Action. Each Leader may target a friendly Wrestler within 6" with a (1) Interact Action to flip a card which may not be cheated and apply one of the following Conditions to the Wrestler depending on the card for the remainder of the Turn:

Black Joker: No effect

⚔ **Viper Cloud:** Any model damaged by this model's **MI** Attacks gains the **Slow** Condition.

🌀 **Panda Belly:** This model's **MI** Attack Actions which deal damage, deal +1 damage.

🥟 **Divine Egg Punch:** Once per Turn, after dealing damage with an **MI** Attack, this model may discard a card to immediately make a (1) **MI** Attack.

🐛 **Sleeping Mantis:** This model gains +1 **Df**.

Red Joker: Reactivate.

VICTORY

When one of the Wrestler models is killed or sacrificed, each player reveals their Bets. The player who's Wrestler is still in play scores a number of **VP** equal to the number they noted down for their Bet.

At the end of every Turn, any Crew which killed or sacrificed two or more non-Peon enemy models scores 1 **VP**. A Crew may not score more **VP** in this way than 4 minus the amount they placed for their Bet (For Example, if a player wrote down 4 for her bet, she would not be able to score any **VP** in this manner, if she wrote down 3 for her Bet, she would only be able to score 1 **VP** in this manner, etc).
